## ► Atmospheric Garden Lighting Schemes

Many very beautiful gardens are hidden when the sun goes down. With subtle garden lighting we can highlight features in your garden for you to enjoy both indoors and outside. Charles Hogarth Landscapes specialise in designing and installing garden lighting schemes throughout Hertfordshire and beyond to create a magical enchanting mood and extend the time you spend outside as well as provide a greater sense of security.

Atmospheric garden lighting is both decorative and functional and can be used to set a mood, define paths, highlight garden features and

*"lighting helped to make this garden multi-functional - a place for children in the day and adults in the evening"*

*"lighting helped to make this garden multi-functional - a place for children in the day and adults in the evening"*

guide you around the garden and up steps. Garden LED lights are particularly effective sunk into decking and not only look good but act as a safety feature. Garden spike lights can be chosen from various styles and are easy to position in the soil and adjust for best effect.

Up-lighting specimen trees and architectural plants with soft white light really shows off the structure and foliage and creates dramatic shadow effects. Subtle underwater pond lighting and water feature lighting is also very effective, particularly in clear water when directed to illuminate a fountain or waterfall. As garden lighting specialists our experience tells us what to light and how to achieve a stunning display - the secret to garden lighting is not to over do it!
