Garden Water Features & Waterscapes

Water features are our speciality - anything from small water fountains, garden ponds and formal water sculptures to recreating a Scottish highland brook in a rural Wiltshire garden! Water adds a truly magical and relaxing dimension to a garden, and provides a fantastic focal point for subtle lighting, particularly when softened with lush planting.

Each water feature we create is original and unique to each garden owner. Whether you choose to have a simple, modern water feature or a more traditional wildlife pond, you'll attract a whole host of wildlife visitors to enjoy.

Introducing water to the garden creates a magical atmosphere, particularly when lit with subtle garden lighting.

"as part of this garden a wonderful natural pond was created with a pebble beach for wildlife"

As water feature specialists in design, build and maintenance we can advise you on the best way to introduce water to your garden to suit your lifestyle, taking into account the amount of aftercare required and time available.

Charles Hogarth Landscapes have constructed many fish ponds and Koi ponds throughout Hertfordshire and can advise on and design and build a water feature to suit you. A fish pond is a joy to have, but requires regular maintenance so is a great choice if you are looking for a hobby, especially if you plan to keep Koi. If time is an issue, we can design a low maintenance water feature to suit (or we can always maintain it for you!).

If you have young children then safety is a key consideration and there are many creative ways to introduce water safely in the garden so please do contact us to find out more.
